France, in Western Europe, encompasses medieval cities, alpine villages and Mediterranean beaches. France has managed to retain its crown as the most visited country in the world thanks to the 89 million visitors that came to see its sights in 2017.

Paris, France's capital, is a major European city and a global center for art, fashion, gastronomy and culture. Paris is a city of vast, noble perspectives and intimate, ramshackle streets, of green open spaces and of quiet squares. This combination of the pompous and the private is one of the secrets of its perennial pull.
